Education

University of Management and Technology Lahore, Pakistan
Bachelor of Science in Software Engineering. GPA: 3.7/4.0 Expected Graduation: February, 2027
Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Architecture, Software Engineering, Object-Oriented Programming (OOP), Computer Networks, Operating Systems

Queen Mary College Lahore, Pakistan
Intermediate Pre-Engineering 2020-2022
Grade: A

Projects

1. **AI Job Market Analysis & Salary Prediction**
   - Analyzed 15,000 AI/ML job postings to identify skill demand trends and salary patterns.
   - Applied KMeans clustering to discover job role groups based on required skills.
   - Built a Random Forest regression model ($R^2 \approx 0.58$) to predict salaries and visualize insights.
2. **Django User Authentication & Profile Management Web Application**
   - Engineered a secure authentication and profile management system using Django's built-in authentication framework.
   - Implemented user registration, login/logout, and session-based access control.
   - Designed a custom Profile model (One-to-One with User) for extended user data.
   - Developed profile update functionality with image upload and server-side validation.
   - Applied server-side validation, template inheritance, and modular project organization for maintainability.
3. **Desktop Application – PyQt5 & Qt Designer**
   - Developed a GUI-based desktop application using Qt Designer for frontend design and Python (PyQt) for backend logic.
   - Implemented event-driven programming and modular architecture separating UI and business logic.
   - Integrated persistent data handling using file/database storage.
   - Applied object-oriented programming principles for structured and maintainable code.
4. **Dynamic CV Builder – HTML, CSS, JavaScript**
   - Built a client-side web application enabling users to generate structured CV templates through form-based input.
   - Implemented real-time DOM manipulation for dynamic CV rendering.
   - Designed responsive layouts using HTML5 and CSS3.
   - Applied client-side validation for accurate and structured data handling.
5. **Event Management System – Java**
   - Developed an event scheduling and registration platform using 5 design patterns.
   - Increased modularity and reduced code duplication by 25%, enhancing long-term maintainability.
6. **Portfolio Website**
   - Built a responsive portfolio using HTML, CSS, and JavaScript to showcase academic and personal projects.
7. **E-commerce Database Design – MySQL**
   - Designed an optimized relational database schema with 8 tables using 3NF normalization and relational constraints.

Certificates

Machine Learning with Python – freeCodeCamp
- Learned core ML concepts including supervised learning, regression, classification, and model evaluation using Python and Scikit-learn.
- Applied data preprocessing, feature engineering, and model training through practical exercises.

Responsive Web Design – freeCodeCamp
- Completed a structured program covering HTML5, CSS3, and responsive layout techniques.
- Built 20+ practice projects to strengthen front-end development skills.

Web Design for Web Developers – Udemy
- Studied modern UI principles, color theory, and responsive design practices.
- Applied these concepts to build and refine multiple sample web pages.

Technical skills

- Programming Languages: Python, Java, C++, JavaScript, SQL, HTML5, CSS3
- Frameworks & Libraries: Django, React, Node.js, PyQt5, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- Web Scraping: Selenium
- Tools & Version Control: Git, GitHub, VS Code
- Other Tools: Kali Linux, Cisco Packet Tracer
